***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-40 and 43-56, drawn to thermal body applicators, classified in class 607, subclass 096
- II. Claims 41-43, drawn to medical methods, classified in class 128, subclass 898.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus may be used for heating processes by altering the circulating fluid.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

If group I is elected, a species election is also required.

Group I contains claims directed to the following patentably distinct species of the claimed invention:

Species 1 as shown by embodiment 1 in Figures 3 & 4.

Species 2 as shown by embodiment 2 in Figures 13 & 14.

Species 3 as shown by embodiment 3 in Figure 16.

Species 4 as shown by embodiment 4 in Figure 17.

Species 5 as shown by embodiment 5 in Figure 18.

Species 6 as shown by embodiment 6 in Figure 19.

Species 7 as shown by embodiment 7 in Figure 20.

Art Unit: 3739

Species 8 as shown by embodiment 8 in Figure 21.

Species 9 as shown by embodiment 9 in Figure 23.

Species 10 as shown by embodiment 10 in Figure 26.

Species 11 as shown by embodiment 11 in Figures 29 & 30.

Species 12 as shown by embodiment 12 in Figure 32.

Species 13 as shown by embodiment 13 in Figure 39.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

It is noted that several variants of a non-cap shaped tissue cooling device are disclosed. If any claim is identified with the elected species that includes such a configuration (i.e. claim 26), additional election may be required.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 3739

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Henry M Johnson, III whose telephone number is (571) 272-4768. The examiner can normally be reached on Monday through Friday from 6:00 AM to 3:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Linda C Dvorak can be reached on (571) 272-4764. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
